Disaster declared in flooded areas

Cleanup efforts continuing

By AMY JOI BRYSON
Standard-Examiner staff

NORTH OGDEN — A neighborhood wrecked by a massive weekend mudslide has been declared a disaster area, and officials say as many as 1,200 homes in Weber County may have been affected by the flooding triggered by a record-breaking rainstorm.

While residents worked this morning to salvage what they could from their homes, officials said damages easily could reach into the millions — adding that preliminary reports indicate at least two homes were destroyed and nine sustained major damage from the 60-foot-wide mudslide in Slide Canyon.

Representatives from 18 agencies were trying to help the homeowners mop up and assess the damage to their properties, and emergency assistance facilities had been set up in a local church building and a senior citizens center.

No injuries have been reported.

Weather officials say the storm dumped 8.4 inches of rain in a 24-hour period that began Saturday in North Ogden — a record for the state — triggering the mudslide north of North Ogden Canyon and flash floods in Pleasant View, Harrisville and Farr West.

More flooding is possible, with forecasts calling for rain to continue through Tuesday along the Wasatch Front.

The Camarren Cove subdivision — where damage was the heaviest — was declared a disaster area Sunday by the Weber County Commission and the American Red Cross.

The mudslide swept through the back yards of several homes, pushing one home off its foundation, crunching storage sheds and slamming debris into brick walls. Homes along 1375 East sustained the worst damage, the road covered with nearly 6 feet of mud and rocks.

A section of the North Ogden Divide Road also was covered by debris from Saturday's slide. The road remained closed today.

Also affected by the storm were:

- Ogden City, which reported minor flooding. Workers distributed about 800 sandbags to residents worried about flooding in the northern and central parts of town, said Public Works Director Rocky Fluhart. A 20-foot strip of Mountain Road at 1100 North was washed out by floodwater over the weekend, he said.

- The Ogden School District's aging Building No. 2 at 2444 Adams Ave. had soaked carpets and papers this morning from weekend flooding. Spokesman Jane Renstrom said secretaries and janitors were mopping up the water this morning.

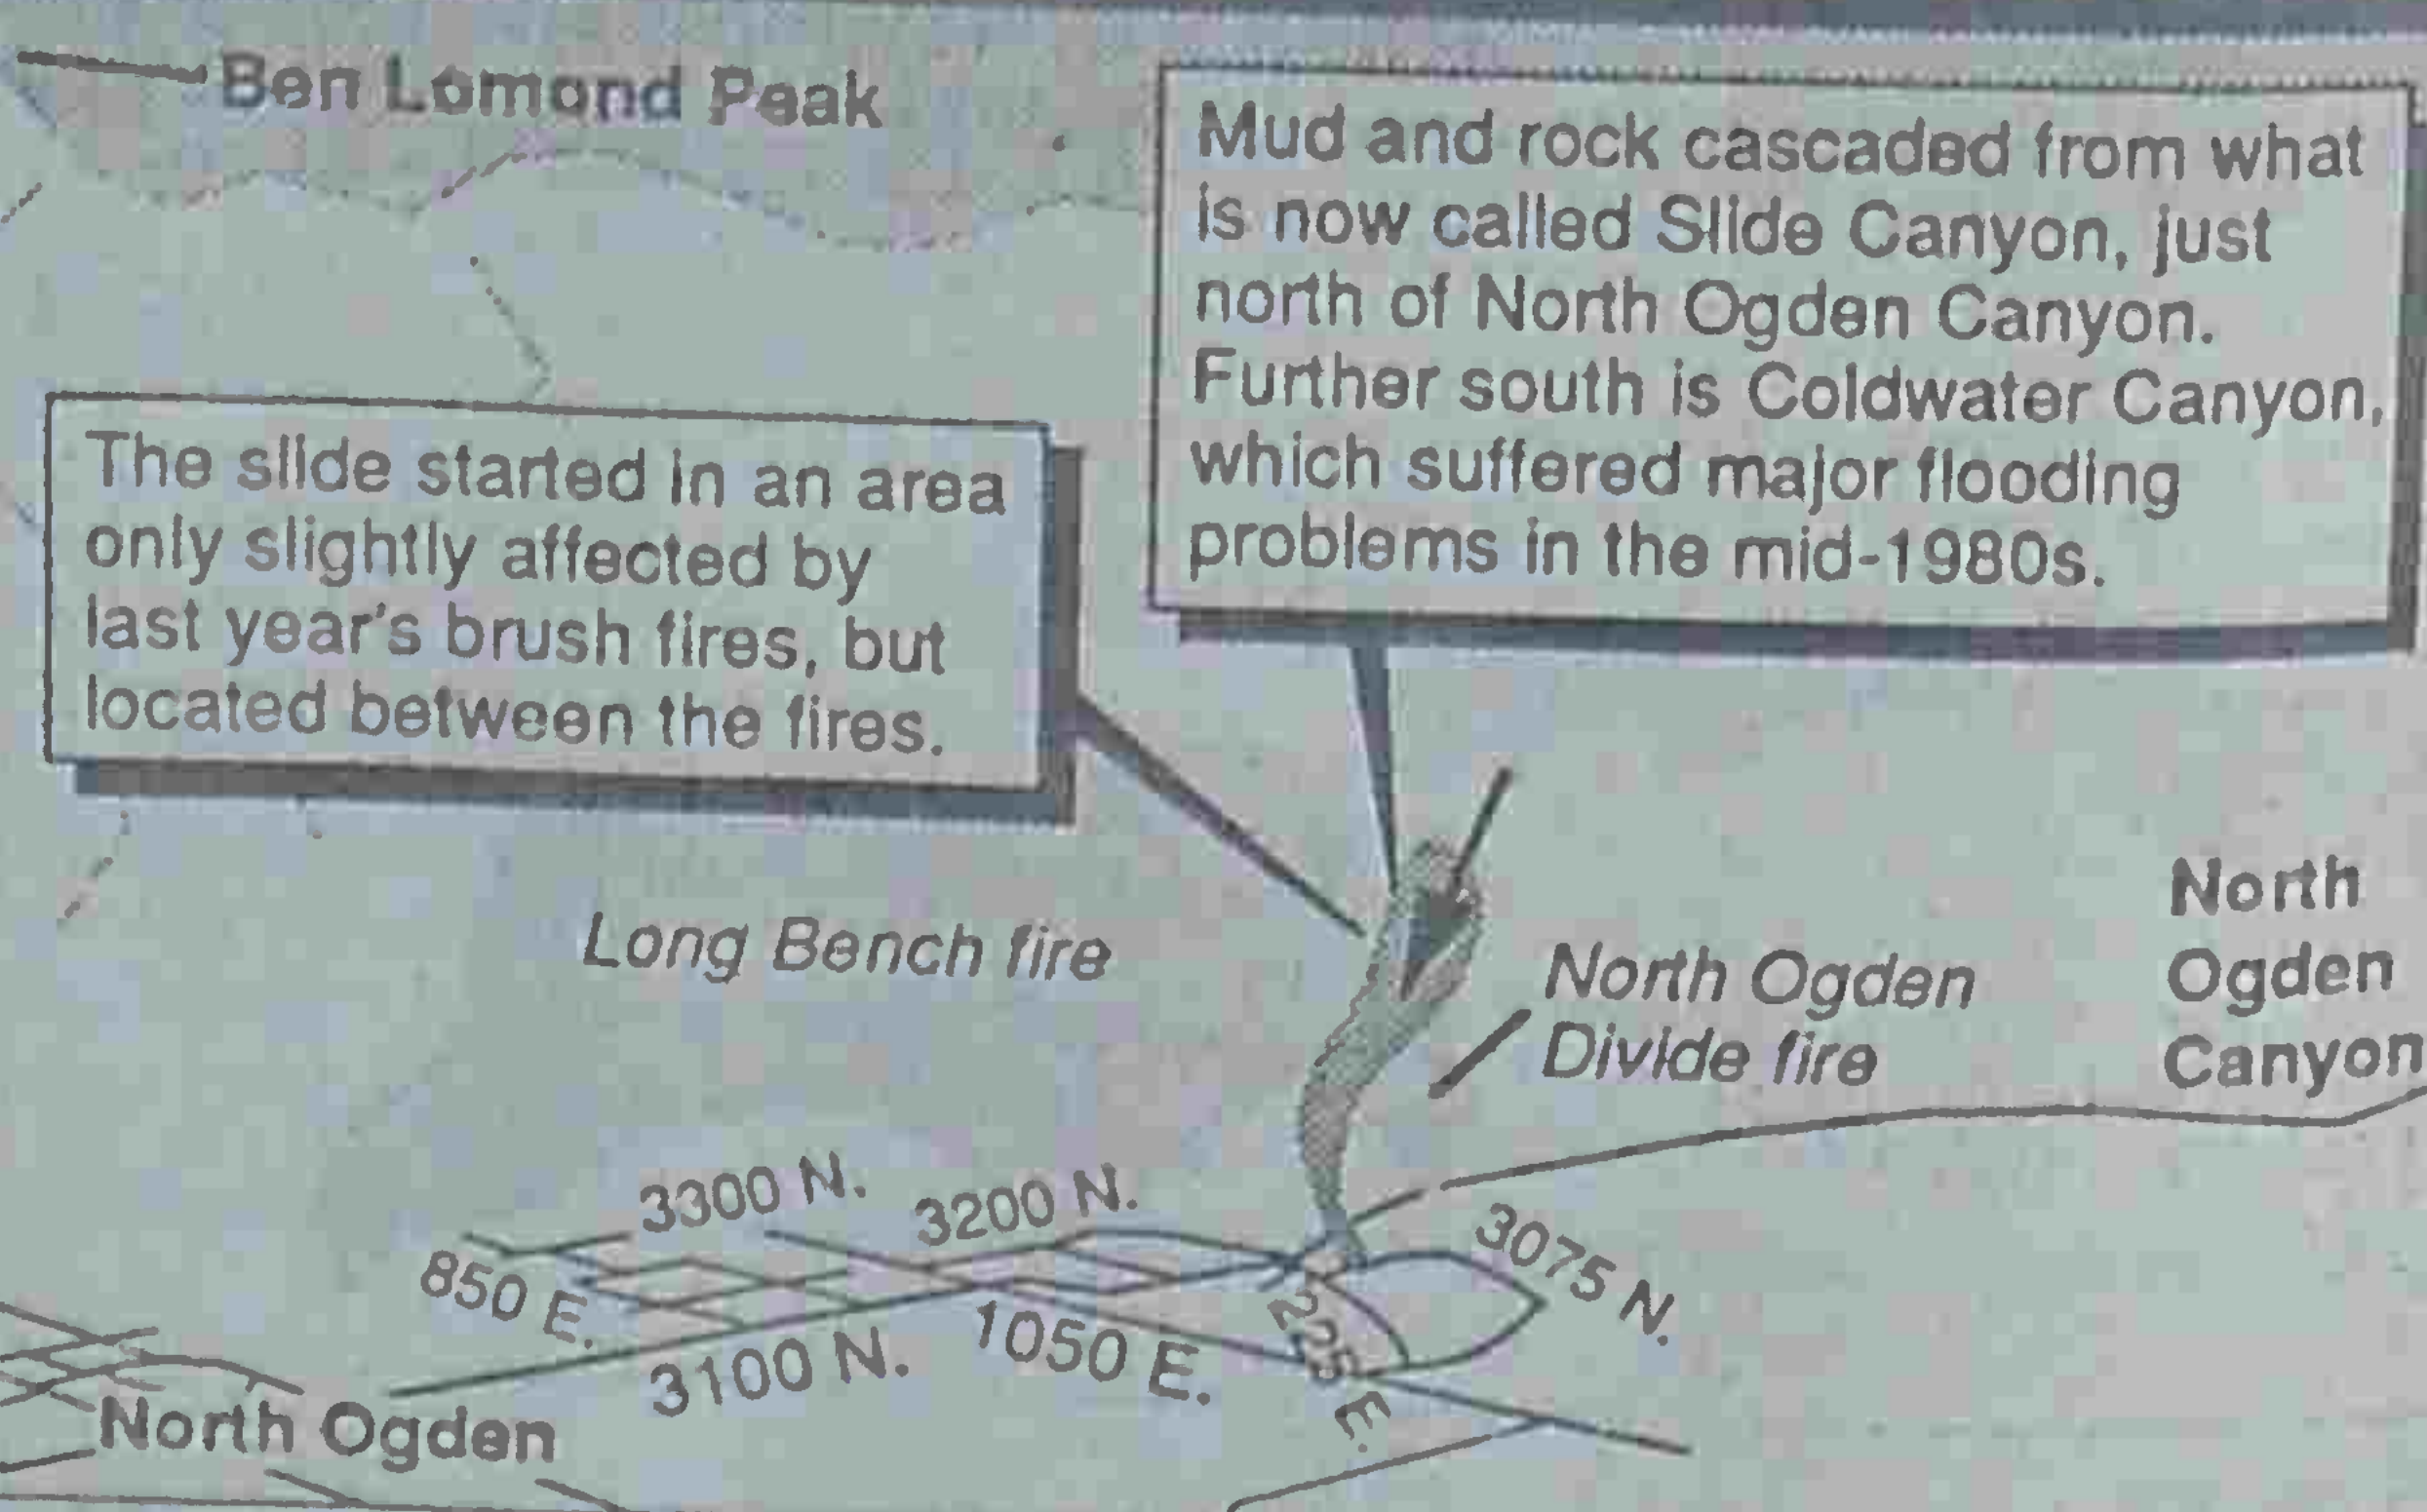

- Harrisville's Misty Meadows subdivision had a few houses that were damaged by flooding when the Farr West canal was breached, said Brad Dee, Weber County emergency services director.

Flood facts

- Officials say weekend flooding in Weber County probably affected at least 600 homes, with the most severe damage occurring in the North Ogden bench area.

- The Bonneville chapter of the American Red Cross already has served about 1,500 meals to volunteers combating the flooding.

- An estimated 4,000 volunteers have helped shovel mud, remove debris and lay sandbags in the area.

- The 8.4 inches of rain that fell in North Ogden is the new one-day precipitation record for Utah.

Mudslide was a rare, rocky sight

By PAT BEAN
and CHARLES TRENTLMAN

The rock and mud slide that careened down North Ogden's East Bench over the weekend was a once-in-a-century occurrence, a Forest Service spokesman said this morning.

"But then, the Wasatch Range is notorious for such events," said Robert Tonioli, who walked the path of the rock and mud slide Sunday.

Weather officials say 8.4 inches of rain fell in North Ogden with a 24-hour period beginning Saturday. Tonioli said the water, dumped on the face of a very mountain, "and the ground quickly became so saturated it couldn't hold the water."

"So much water started flowing down the natural channels that it brought everything down with it, including rocks the size of pickup trucks," said the Forest Service specialist.

"Even a retaining basin would have stopped the water; it was too powerful," Tonioli said. In places, it scoured the mountainside right down to the bedrock.

Although the mud slide was in the middle of two areas involved in mountainside fires this summer, Tonioli said the already revegetated areas.

"Those areas (involved in mudslide) appeared to have vegetation than anywhere else. I'd have to say the alternate fires did not contribute to flooding," he said.

Tonioli said the Forest Service is looking into the matter.

Capitol Hill action likely, but not on bills

By STEVEN KOMAROW
The Associated Press

WASHINGTON — The Congress that returns this week won't much resemble the lethargic group that left five weeks ago, as lawmakers rush to respond to sweeping changes abroad and the start of the political season at home.

But frenetic activity may not produce legislative accomplishment.

Hearings on President Bush's nomination of Clarence Thomas to the Supreme Court and of Robert Gates to head of the CIA promise to generate political smoke and heat.

So, too, do the upcoming debates over what role the United States should play in aiding the Soviet Union, or in pushing forward a Middle East peace conference or whether the country should just pay more attention to its problems at home.

A Capitol Hill investigation may uncover

ANALYSIS

whether American officials played an unsavory role in protecting the scandalous Bank of Commerce and Credit International.

And another probe is trying to settle once and for all whether President Reagan's 1980 campaign, in its zeal to beat Jimmy Carter, made a deal with Iran to delay the release of the U.S. Embassy hostages.

But behind those headline-stealers, Congress will struggle to complete this year what a few months ago seemed to be a very modest legislative agenda.

They've had five years to work on it, but it appears unlikely that lawmakers will pass a new national highway and transportation program before the old one expires on Sept. 30.

The Senate has finished its version, but House leaders last month were forced to

withdraw their proposal in the face of near-certain defeat. Despite strong backing from Speaker Thomas S. Foley, D-Wash., neither Republicans nor rank-and-file Democrats were ready to back a bill with a 5-cent-a-gallon increase in the federal gasoline tax.

A new highway bill is in the works, but emergency legislation may be needed to extend the current program after the deadline.

Another "must pass" bill for the fall is a rewrite of the nation's banking laws. There's no light at the end of that tunnel, even though the effort comes at a time when Congress is also being asked to ante up \$150 billion more in taxpayer money to cover more bank and thrift bailouts.

And with only three weeks to go until the start of the new fiscal year, Congress still hasn't finished most of the annual spending bills that keep federal agencies in business.

Democrats are using several of the bills to highlight Bush's anti-abortion stance. Dur-

ing the recess, the president vetoed the District of Columbia's budget because it would have permitted use of local tax money to pay for abortions for poor women.

Moreover, the Soviet upheaval appears to be ending the budget truce that Bush and the Democrats reached last year. House Armed Services Committee Chairman Les Aspin, D-Wis., is proposing to cut \$1 billion from the agreed-upon \$292 billion Pentagon budget for next year, and give that money to the Soviets for humanitarian purposes.

Other Democrats say the Soviet threat is now so reduced that billions more should be transferred from defense to cover education, health and other domestic priorities.

But at least one controversy seems firmly behind them as the lawmakers return — the Senate on Tuesday, the House on Wednesday. During the recess, Bush signed a bill giving senators a pay raise.

Clinician not for all abortions

WICHITA, Kan. (AP) — Anti-abortion protests this summer have targeted a clinic that performs third-trimester abortions, but the clinic's owner says he opposes most such abortions and has asked lawmakers to restrict them.

And he accuses the protesters of wanting a male-dominated society.

In an interview published in Sunday's editions of The Wichita Eagle, Dr. George Tiller said he supports banning third-trimester abortions except when the woman's health is in danger or in cases of severe fetal abnormalities.

He said he made his recommendation to medical groups and politicians, "and I was ignored."

His clinic, Women's Health Care Services, is one of seven clinics in the nation where third-trimester abortions are performed, he said.

But Tiller said he was tired of claims that he performs elective abortions up to the point of birth.

"I don't do everybody that comes through the door, and don't do people who don't want an abortion," he said. "We have a lot of adoptions."

More than 2,600 arrests were made this summer during demonstrations by the national anti-abortion group Operation Rescue.

Late-term abortions are performed only on fetuses that are severely deformed or missing vital organs, Tiller said.

"Nature makes mistakes," he said.

Utah Hospital Association defends cost shifting

By JAMES THALMAN
Standard-Examiner staff

Hospitals commonly charge insured patients more than the actual cost of treatment to help pay the cost of treating those unable to pay, a practice that seems unfair to a lot of patients and, according to hospital critics, is dishonest.

Cost shifting is wrong, charging patients for services they do not receive, especially when hospitals already are getting a tax break to help them pay for the indigent care or for others who can't or don't pay,

say members of the Cache Mayors Association, which called for and got an independent audit of Logan Regional Hospital.

The Utah Hospital Association says cost shifting is essential for survival.

Association President Rick Kinnersley said it's like any retail business adding a percentage to the cost of its merchandise to counter losses due to shoplifting.

In 1983, cost shifting added \$120 a day to the typical hospital bill; last year, it added about \$485 to each bill, according to the associa-

tion. The hospital's tax-exempt status was scrutinized closely the past year by a group the mayors' association, which said Logan Regional Hospital should lose its exemption status due to high costs and flawed accounting methods.

An audit performed by Coopers and Lybrand found there was no fraud, but it did not determine whether the hospital qualifies for tax exemption. That will be up to the seven-member Cache County Council, which meets Sept. 10 to vote on the exemption.

Hospital officials say cost shifting is done at nearly every facility in the nation.

Hospital officials blame state and federal legislators, saying they have reduced Medicare and Medicaid reimbursements to the point that they "are threatening our very existence."

State officials say they are doing the best they can with the money they are given.

"It comes down to the fact that hospitals have to cover their costs or go out of business. Ultimately, it's the consumer who ends up pay-

ing," Kinnersley said.

In 1982, Utah hospitals were reimbursed 91.8 percent of their billed charges on state Medicaid patients. This year, reimbursement levels are down to about 63 percent, resulting in a \$45 million shortfall.

In 1982, Utah hospitals provided \$65 million in uncompensated care, including Medicare, Medicaid, bad debt, and charity care. Last year, that figure was \$332 million, Kinnersley said.

The Associated Press contributed to this report.

Hospital

patients do not pay full price for services provided by the hospital.

Officials at Intermountain Health Care, which owns 23 non-profit hospitals including McKay-Dee, report that a 1986 study showed Utah's non-profit hospitals received \$17 million in tax exemptions and donated \$36 million in charitable services.

The state Constitution says property used "exclusively for ... charitable purposes" may be exempt from property taxes.

IHC reported gross revenue in 1990 as \$933 million and charity care of \$12 million, or 1.3 percent of its income.

"That percentage is a pittance and doesn't sound like charity is even a minor portion of the purpose, let alone exclusive," Allen said.

In assessing eligibility for exemption, the Utah Supreme Court in a 1985 ruling on tax-exempt status in Utah County said it depends on "whether the stated purpose of the entity is to provide significant service to others without immediate expectation of material reward."

The U.S. General Accounting Office in a report in May 1990 said it is common for a not-for-profit hos-

pital's strategic goals to resemble an investor-owned company — that is, they focus on increasing the market share rather than targeting underserved populations or addressing particular health problems of their communities.

One of the goals of the tax exemption is to recognize the charitable role of the hospital and encourage hospitals to continue or expand current levels of charity care, the GAO said.

Unfortunately, Allen said, the community receives very little health care charity from its non-profit hospitals, and as a result, communities constantly are approached for donations to private charity programs to raise money for

people with life-threatening illnesses who are refused service at both for-profit and non-profit hospitals until they can raise the money needed to pay the anticipated bills.

"Non-profit hospitals claim they can't afford to provide this charity, but their own reports show that some have hundreds of millions of dollars set aside in reserve funds for future needs," Allen said.

Hospitals have collection agencies that seek legal judgments against hundreds of patients a week who are slow in paying their hospital bills, he said.

Hospital officials often say it is a benefit to the community to have the hospital in town.

Allen said virtually any business is a benefit to the community, and most of them pay their share of taxes. "It is not fair to give a non-profit business an exemption merely because it benefits the community."

Most hospitals do not notify patients that health care is available regardless of their ability to pay, Allen said.

Wendell Ashton of Utahns for Nonprofit Hospitals has said if hospitals were required to give even modest notice that charity health care is available, people would come out of the woodwork seeking it.

Allen said that not giving notice implies that the patient is entitled to nothing and must appeal to the benevolence of the hospital's business office. Allen said not posting signs is a sure sign that nonprofit hospitals don't see themselves as charities.

"It appears that it is in the career interest of hospital officials to maximize return on investment and to keep profits high by providing as little health care charity as they can get away with," Allen said. "Hospitals that restrict charity for this reason are cheating thousands of people out of health care they have paid for through tax exemption."

National AIDS activist Mason dead at age 33

NASHVILLE, Tenn. (AP) — AIDS activist Belinda Mason, the only member of President Bush's National Commission on AIDS infected with the virus, died this morning at age 33.

Stephen Carden, her husband, in a telephone interview from their home in Utica, Ky., said his wife died around 8 a.m. at the Vanderbilt University Medical Center in Nashville.

Mason's mother and father, state Rep. Paul Mason, were with her when she died, Carden said.

Mason, originally of Whitesburg, Ky., founded Kentucky People With AIDS, the first Kentucky-based group dedicated to fighting for a cure. She also was a member of the AIDS Action Council, a national AIDS lobbying group.

Mason was president of the National Association of People With AIDS when Bush appointed her in 1989 to the commission created by his predecessor, Ronald Reagan.

Mason, who had been hospitalized since Wednesday, became infected with HIV — the virus that causes acquired immunodeficiency syndrome — in January 1987 while receiving a blood transfusion during the birth of her second

child. She was diagnosed with the disease in October 1988.

She was critical of the Bush administration, saying it treated AIDS crisis as a moral issue instead of as a public-service issue. Mason wrote a letter to President Bush Aug. 2 asking him to use his influence to keep people with AIDS from being stigmatized.

Mason moved to West Virginia in 1990. She worked as a reporter for the Appalachian Express in Pikeville and for the Times News, both weeklies, and wrote there before becoming involved in AIDS organizations.

She also leaves two children, Polly, 8, and Clayton, 5, and said Mason would have been on their farm.

WORLD FAMOUS TABERNACLE CHOIR AND ORGAN

The famous Mormon Tabernacle is the oldest building on Temple Square. Construction was begun in 1863 and completed in 1867, two years before the railroad joined East to West in Northern Utah. At the time, Salt Lake City was an isolated pioneer community more than a thousand miles from the frontier settlements of Missouri and Illinois, from where the Mormons had been driven, and seven hundred miles from the Pacific Coast.

Because of the distance and difficulty of obtaining materials, most of the lumber and building needs were found locally. The pioneers were people of culture and refinement, accustomed to hardwoods and marble. Since these materials were not available in the area, the abundant local white pine and sandstone were used by these industrious pioneers.

Brigham Young, then second president of the Church of Jesus Christ of Latter-day Saints—commonly called Mormons—commissioned Henry Grow, a bridgebuilder, to erect the roof of the Tabernacle. The roof is fashioned after bridge construction, supported by wood arches which span the width of the building. Steel was not available in this area. The building is 250 feet long by 150 feet wide and 80 feet high. The timbers are latticed and pinned together with large wooden pegs and rawhide thongs. The roof rests like an enormous inverted bowl on 44 columns of cut sandstone. The acoustic qualities of this structure are exceptional for a building of this size. Inside, the columns and benches are made of white pine. The columns are finished to look like marble and the benches are finished to look like oak.

The Tabernacle seats approximately 6,500. General Conferences of the Church are held within its walls as well as other religious gatherings. Great artists of the world have performed here and leading lecturers have spoken, including

outstanding clergymen of many faiths and nearly every president of the United States since the turn of the century.

No less famous than the Tabernacle are its organ and choir. Behind the construction of the original organ is a story of artistic craftsmanship and perseverance in the face of great obstacles. Joseph Ridges, an organ builder from Australia, fashioned pipes from tall, straight-grained pine which was hauled 300 miles to Salt Lake City by ox-drawn wagons. Some of the original wood pipes are still in use.

In the beginning, the organ was powered by hand-pumped bellows, later by water power, and today by electricity. With improved techniques in organ construction, the instrument has been renovated and enlarged several times. Now comprising 11,623 pipes, the organ has 206 ranks or voices and the console has five manuals or keyboards. It is considered to be one of the finest in the world. Free organ recitals are held daily Monday through Friday at noon, and at 4:00 p.m. Saturday and Sunday.

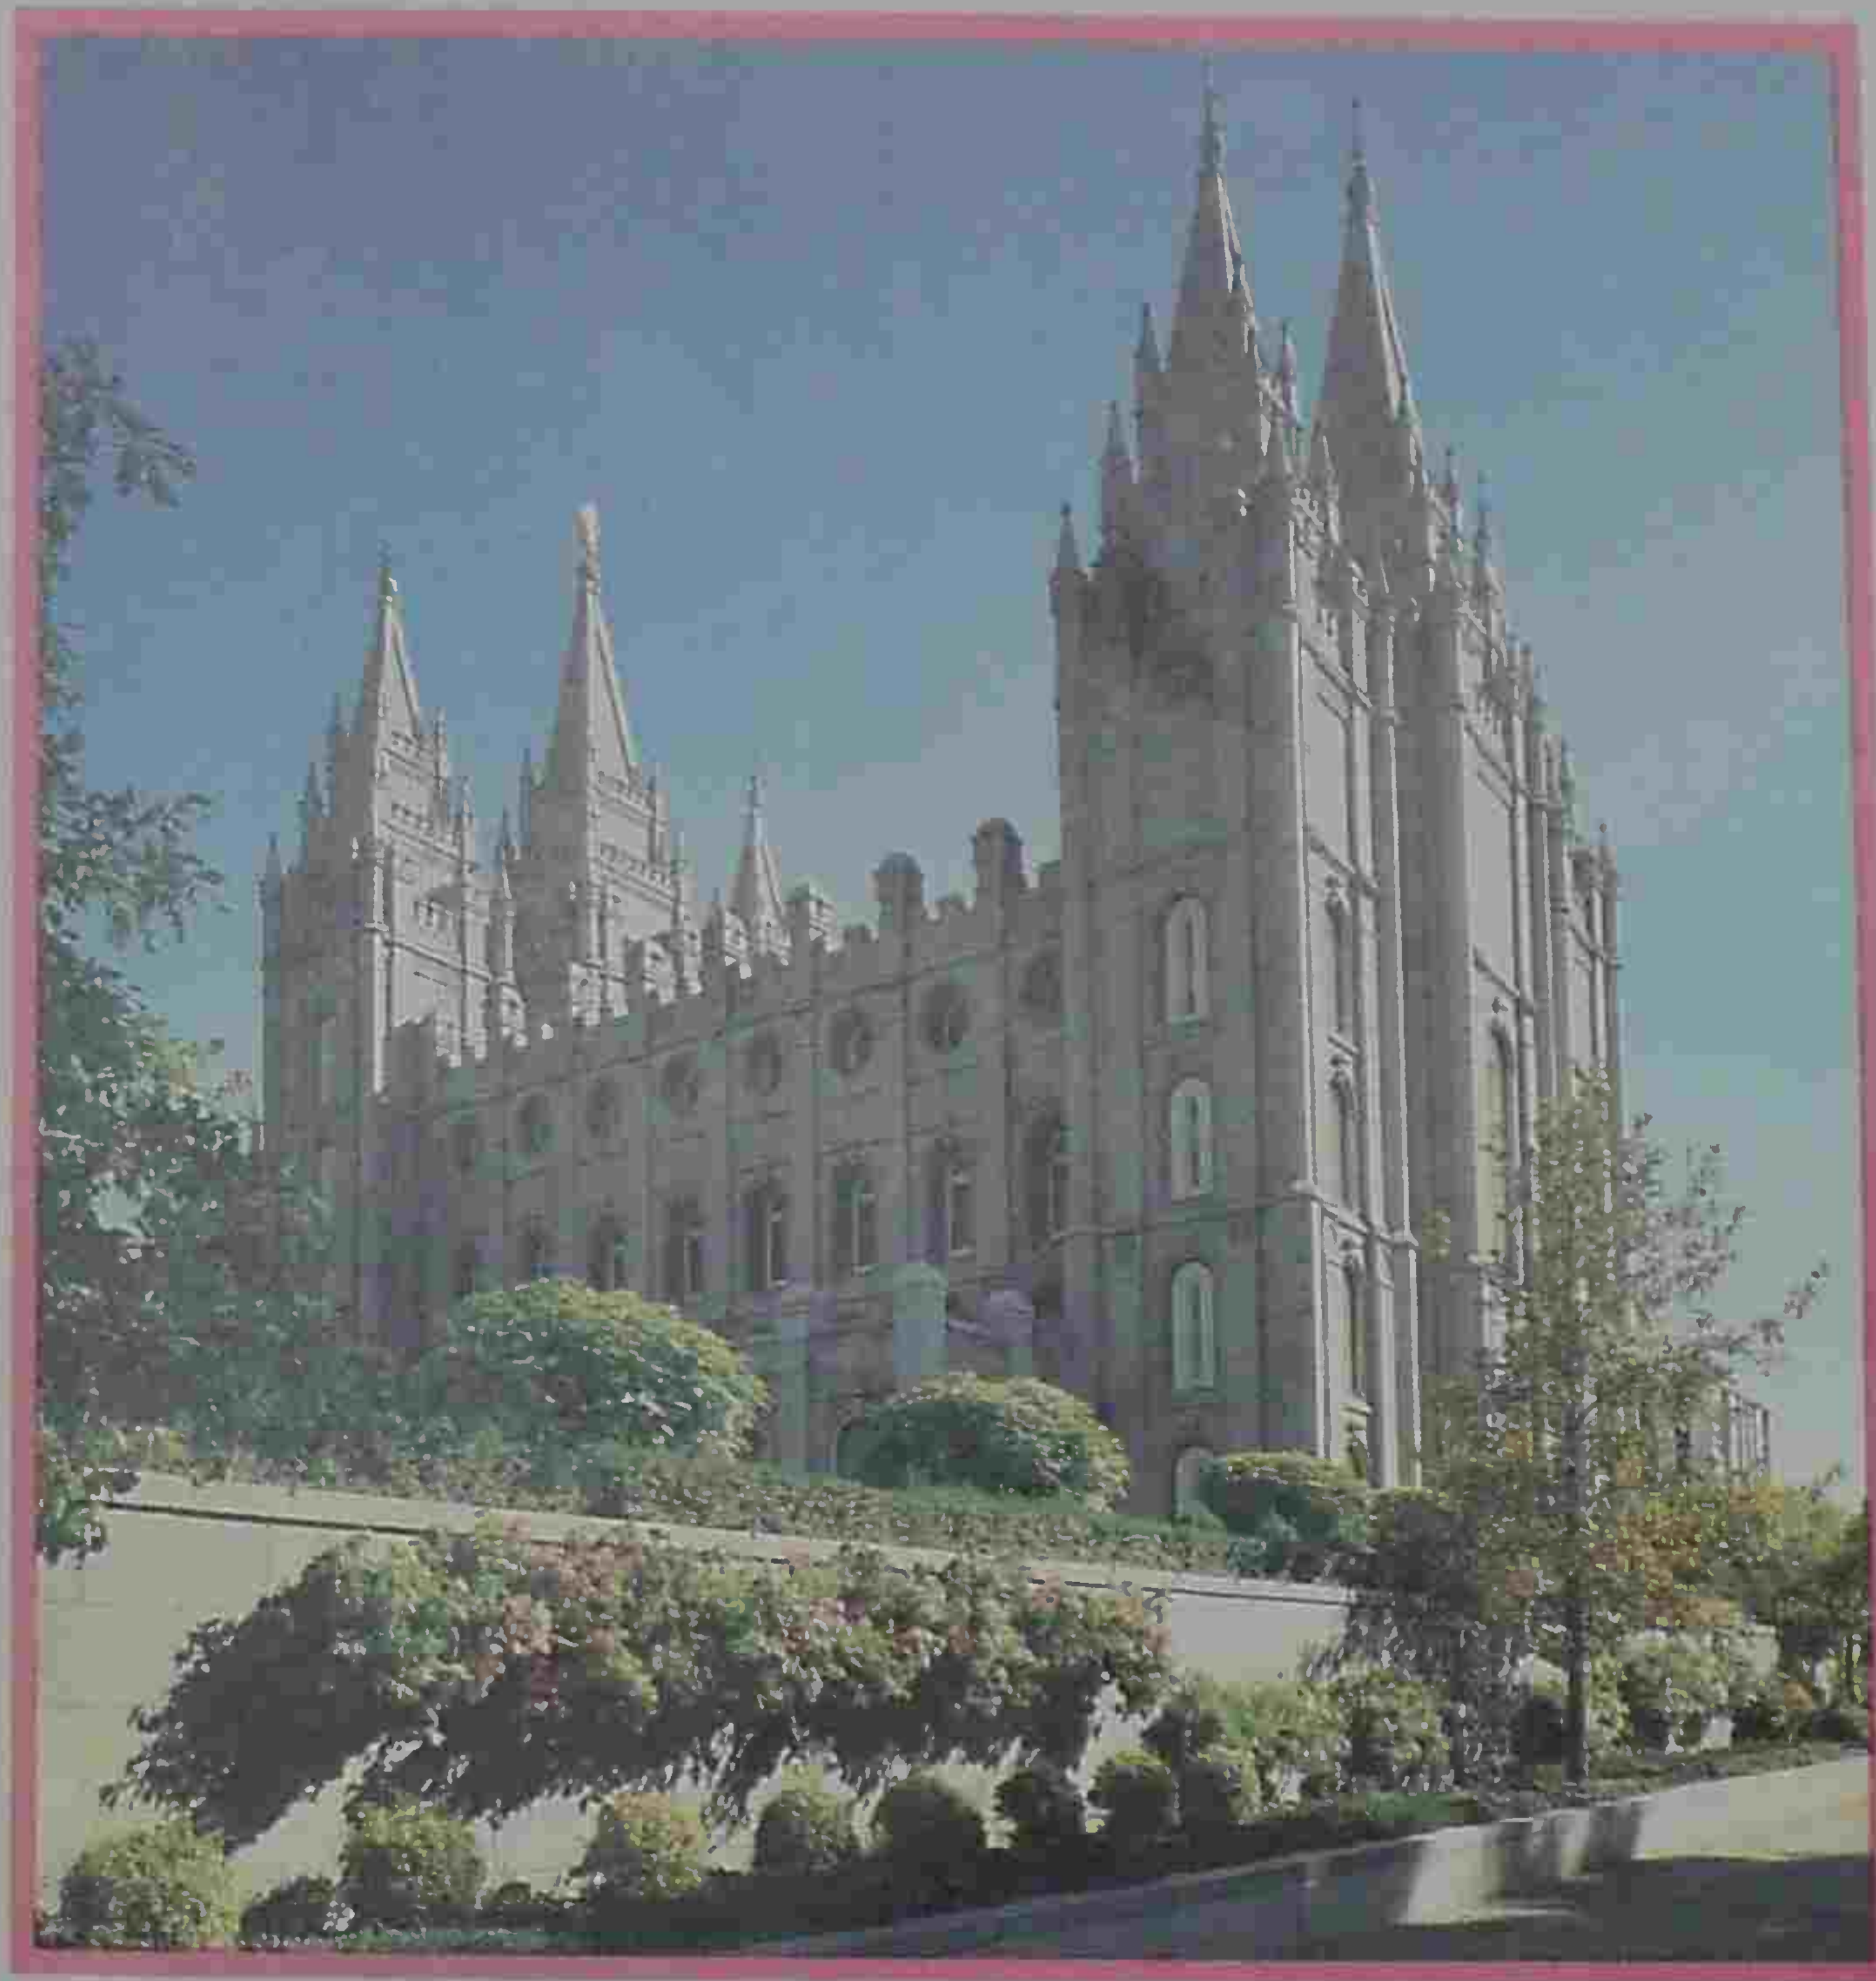

The Tabernacle is the home of the Mormon Tabernacle Choir. The choir's Sunday morning performance, broadcast around the world by radio and T. V., is free of charge and open to the public. Those wishing to attend must be in their seats by 9:15 a.m.

The Tabernacle Choir originated under the direction of Brigham Young. Its renown and influence has steadily increased throughout the world. The choir has performed in numerous countries and has been honored for its recordings, the most famous of which is "The Battle Hymn of the Republic." The three hundred and twenty-five choir members come from all walks of life and are unpaid volunteers who sing for the love of great music and for the satisfaction they receive in giving pleasure to others.

After house work I put night clothes, medicine & Edward packed his stuff in suitcase. Went to the grocery store for bananas, cookies, candy & popcorn. I called Evelyn to let her know we were coming.

The Spoken Word "Anticipating Christmas" Given by Lloyd D. Newell December 8, 1991

Christmas is coming.

For almost twenty centuries, that message has brought hope and anticipation. While Christmas harkens back to that holy night in Bethlehem, the glory of the holiday is also in its focus on the future—in the excitement of good things to come.

We anticipate and prepare for this holiday like no other. The shopping, the wrapping, the decorating—these all add to the spirit of the occasion. Many children have little calendars with a door to open for every approaching day—or paper chains from which they detach a link each day—to mark the coming of Christmas. The gaily wrapped presents prompt the imagination. The festive aromas tantalize the taste buds.

Certainly, hope and anticipation are appropriate attitudes at Christmas time. The first Christmas was the fulfillment of centuries of hope. Prophets had foretold that a Messiah would come to save His people. The believers waited and watched for the signs. Even in far off lands of the east, wise men were aware that certain changes in the heavens would mark the coming of the King of the Jews. Hope and anticipation led them to follow a star to Bethlehem.

The scholars of Herod's court were likewise acquainted with the scriptural promises. They were quick to inform the king that the Messiah would be born in Bethlehem as the prophets had predicted.

As it was on that first Christmas day, so it is today. The great appeal of anticipation brings us back to the baby in Bethlehem. Many hopes were realized with the coming of the Christ child. But much was foretold that night which has not yet been fulfilled. The angels promised peace on earth and good will toward all men. Scanning yesterday's history or today's headlines quickly tells us how far we are from that heavenly state.

The beautiful scene of a child loved and cared for gives us hope that one day all children will be welcomed—with anticipation. The innocent baby Jesus helps us look to the day when each of us and all the world will be sinless once again.

The summation of all these symbols is our promise of a better world. Each Christmas brings us closer to that blessed day. Again, the anticipation rises this year. The hope of that holy night again sustains us. Be of good cheer, for Christmas is coming.
